

The proposal to severely limit FAIR USE of digital television broadcasts is not the right way to go about attempting to preserve Hollywoods wishes. Right now, you can record a TV show or movie and view it later on VCR or Tivo/etc. You already pay for the broadcast, it should not matter when you wish to watch it. Digital Television is NO different. I should be able to do the same thing, record any content I want and watch it whenever I want.

Regards,
Stephen Smith
